Oxygen and Aerosol Therapy - Humidification

Quality, innovation and choice

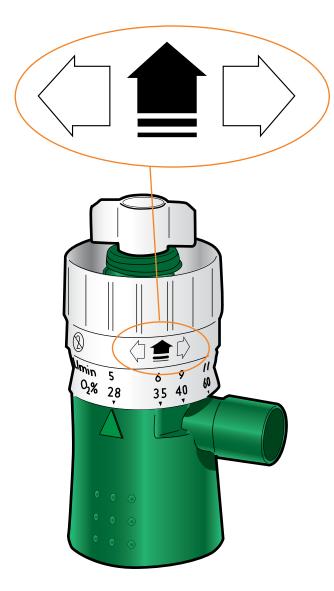

# Intersurgical AquaMist<sup>™</sup> humidifier nebuliser

The Intersurgical AquaMist humidifier nebuliser has been designed to deliver accurate concentrations of humidified oxygen quietly. The humidifier nebuliser allows the clinician to prescribe a concentration of oxygen which will remain unaffected by the flow rate or the patient's own breathing pattern.

The Intersurgical AquaMist humidifier nebuliser offers a range of accurate oxygen concentrations, which may be selected to suit the clinical requirements.

#### **Quiet operation**

The Intersurgical humidifier nebuliser is exceptionally quiet in use – offering a noticeable difference compared to traditional products. This provides a more peaceful clinical environment.

#### High humidification output

The combination of an accurate oxygen concentration and a high humidification output provides an ideal solution to humidification requirements.

#### **Product options**

The Intersurgical humidifier nebuliser is compatible with the most popular standard, sterile water bottles. It is also available with a refillable 500ml bottle if required.

It can be simply attached to the majority of flow meters via the universal screw thread fitting. The 1500000 and 1502000 options are supplied with a 1506001 adaptor enabling them to be fitted to a BOC<sup>®</sup> Flowmeter. An M12 adaptor, code 1509001 is also available.

#### Tamper resistant oxygen control setting

The oxygen concentration selection is made by lifting and turning the top of the nebuliser and aligning the required oxygen percentage with the arrow as highlighted in the illustration left. This tamper resistant control prevents accidental concentration changes, providing a safer and more reliable product.

The humidifier will operate with a driving gas flow of 5 to 11 L/min dependant on the oxygen concentration required

## **Flowmeter adaptors**

Oxygen therapy flowmeters are available with a variety of connection types. The Intersurgical range of adaptors has been designed to permit the attachment of humidification devices with 9/16 UNF Diameter Index Safety System (D.I.S.S) threaded couplings to a variety of flowmeter types.

Please download the explanatory poster entitled Oxygen Therapy Flowmeters to choose the most suitable adaptor for your application:
